ASPIRING SOFTWARE ENGINEER

B.Tech Computer Science student graduating in 2027, with hands-on project experience in Python, Django, and REST API development. Built web applications with user authentication, CRUD operations, database integration, and backend business logic. Familiar with SQL, PostgreSQL, MySQL, and Git, with an interest in developing reliable backend applications.

PROJECTS

Job Application Tracker *(Python, Django)* *(LINK)* *(July 2026 – Sept 2026)*

- Developed a Django web application to manage job applications and track their status.
- Implemented user authentication, CRUD operations, and status updates for Applied, Interview, Offer, and Rejected applications.
- Built a dashboard with application statistics, search, and filtering features.

RecallDSA — (*Python, Django, Django REST Framework, PostgreSQL)* *(LINK)* *(Sept 2026-present)*

- Developed a RESTful backend application using Python and Django to manage DSA problems, revision records, and user-specific learning data.
- Implemented CRUD REST APIs, authentication, authorization, and data validation to securely manage user-owned problem records.
- Designed spaced-repetition business logic with revision intervals of 1, 3, 7, 15, and 30 days and implemented retrieval of revisions due for the current day.
- Created automated tests and security checks for core business rules, API behaviour, and user-level data isolation.
